

Dear ImageSoft,

When the decision was made to look at software products and vendors for purchase of an imaging system, our office talked to several vendors and visited several schools and businesses. We were very impressed with the presentation ImageSoft provided Grand Valley, and felt the company would be a good 'fit' for us. Grand Valley State University decided to purchase the OnBase product with ImageSoft as the vendor.

We cannot put a dollar figure on what the imaging system has provided us. We employed about a dozen student workers to do file work; we now employ two. We are current on processing paperwork and save so much time processing student's requests. The frustration level is down in our office.

There is something to be said about seeing the '100' next to a queue instead of staring at 100 paper files sitting at your feet in your office.

Chris Scott
